

We were very fortunate to be able to enlist the services and experience that Aron provided to ProteMix this past year 2005/2006. We asked him to provide assistance and direction to our clinical/ development team in Auckland, New Zealand on the regulatory strategy for several of our pipeline products. We were pleased how Aron identified highly qualified external resources to augment our clinical team in the production of clinical study reports. He helped drive the process of analyzing our data and generating the study reports in advance of our strategy development discussions with the FDA.

Aron was able to fit into the team activities from day one as a member, including off site meetings reviewing strategies and the business plan. We also engaged him in discussions with our clinical advisory board and our scientific advisory team for some of the activities in early discovery moving into the clinic. He was a very valuable member of the team that asked the often difficult tough questions and pushed back numerous times with lead scientists for further clarity. The right questions were asked and he had many very good suggestions enabling us to utilize other key functional areas to assist with the progression of work.

I certainly will continue to use him with difficult and challenging regulatory issues and welcome his input as a team player. I would recommend him to others given his experience in oncology, diabetes and cardiovascular space. Great team player and good communicator!

Larry Ellingson
former CEO of ProteMix
now Chairman of the Board - ProteMix
